

Trim Water Pressure Relief Valves (Adjustable)

An adjustable set pressure trim water pressure relief valve is a small valve designed to relieve pressure build-up in a sprinkler system or in valve trim. It is open to a drain line. Unless otherwise specified, rated working pressure is 175 psi (1205 kPa). The range of pressure setting is shown below.

Model 55L-60

Product Designation	Nominal Pipe Size Inches, NPT	Pressure Rating psi (kPa)	Remarks
Model 55L-60	1/2, 3/4	300 (2070)	a, b, c, d

Remarks:

- a. Valve supplied with Female NPT inlet and outlet connection.
- b. Adjustable relief pressure settings from 0 to 75, 20 to 200, or 100 to 300 psi (0 to 515, 140 to 1380, or 690 to 2070 kPa).
- c. Approved when supplied with either a stainless steel or bronze valve body.
- d. Not suitable for discharging the full rated pump capacity.
